

Thank you for your interest in our program. The program was established in 1985 as St. Paul Christian Child Care Center. As an outreach program of the church, CCCC began providing full and part time childcare for infants through preschool. To fulfill a need in the community, after-school kindergarten care and school-age care for children up through 4th grade was added to the program. In, 2011, St. Paul Community Nursery School and St, Paul Christian Child Care Center merged to provide childcare, preschool and school-age care to the community under the current name of St. Paul Christian Early Learning Center. We currently offer

We take great pride in the work we do for children and families. We offer a high quality program where each child's social-emotional and academic needs are nurtured by our team of educated, dedicated and caring teachers. Families trust us with their most precious gift-their children and we take that very seriously!

As the world changes so do the needs of families and the community we serve. We continue to look for new and innovative ways to meet these changing needs by offering new programming. We have added enhancement classes like Yoga and Soccer.

Family engagement is an important aspect of our program. Keeping parents engaged and informed of their child's growth and development is one of the things we do best. Parent and teacher partnerships are crucial to every child's success.

Karen Schaeffer
Director of Programming and Operations
